

PREVENTS Eruption Forecasting Project

The **Geophysical Institute Volcanology Team** is looking to fill a new position for a **relational database developer** fluent in SQL, XML, time series data and object-oriented analysis and design. As a database developer, you will have the opportunity to be part of a project that capitalizes on the wealth of data from the Alaska Volcano Observatory; the multidisciplinary expertise of volcano observatory scientists; and the analytical power provided by a team of graduate students, postdoctoral fellows, UAF faculty, and other national and international collaborators.

Salary: This is a full-time, 12-month, non-exempt staff position complete with both a competitive salary and full employee benefits package. New hires will be placed on the UA staff salary schedule, Grade 79, based on education and experience.

UA is an AA/EO employer and educational institution and prohibits illegal discrimination against any individual: alaska.edu/nondiscrimination
