**ALASKA DEPARTMENT OF LABOR  
& WORKFORCE DEVELOPMENT**

## RESPONSIBILITIES:

- Maintain and repair a wide range of automotive, marine, hydraulic, and industrial equipment
- Inspect gas, diesel, hydraulic, and electrical systems and perform repairs as required
- Perform general maintenance and installation work on fishing vessels upon request
- Diagnose mechanical issues in both shop and field environments
- Examine parts and materials to identify defects or failures
- Perform minor welding and fabrication work
- Operate and maintain plant powerhouses, generators, and electrical switches
- Maintain accurate and detailed service and maintenance records
- Monitor and maintain appropriate inventory levels for parts, oils, fittings, and fuels
- Coordinate with and receive directions from the Plant Manager on current and upcoming projects
- Respond to routine and urgent maintenance needs as directed
- Perform other duties as assigned

## North Pacific Seafoods hiring Seasonal Port Engineer at Pederson Point

The Port Engineer is responsible for the operation, maintenance, and repair of facility vehicles and equipment, including forklifts, cars, trucks, engines, motors, pneumatic systems, conveyors, hydraulics, and related machinery. This role also provides maintenance and repair support for fishing vessels on site, as needed. The Port Engineer supports corporate policies and initiatives and reports directly to the Plant Manager.
